Every Inch of the Bates Steel Mule is Thoroughbred

The United States government by means of the Department of Agriculture, has been looking into the tractor question, and its bulletins clearly proves that the satisfied tractor owner-men who say that the tractor has paid-are men who own the BETTER CLASS of tractors. The suc cessful man has learned years ago that he can't get something for nothing. No one can. The reason the BATES STEEL MULE costs more is that it is worth more. Skilled factory procedure, quantity production and the most modern Machinery enables us to save money at every turn, yet the BATES STEEL MULE cost slightly more in the beginning to build but considerably less in the long run to own. It's just another case where a seemingly higher priced article is ar cheapest to own when you come to actually USE it.

The Bates thoroughbred quality comes not from mere ns, but from what's put into it. Every part that goes to AMERICAN LADY CORSET take up the BATES STEEL Mule is put there by long field experience. There is'nt a part that is'nt time-tried and It gies us pleasuse to be able to offer our trade this ex tested. There is'nt a part that experience has'nt dictated the shape and size of; and in it all there is'nt one superflu ous part, nor one part that is'nt capable of standing up un der twice the strain it gets in actual use. These are things experience and practice have distracted. The BATES comes to you as a fulfillment of your desire for a tractor that will endure. Price is what we pay for a thing. Value is what we get out of it. Consider your tractor from what you will get out of it, consider how many working days you have when the ground is wet, consider the operations where you an not afford to pack your seed bed, and consider how constantly and economically they must be performed even in rush times, you will then see why the BATES STEEL ULE is the biggest value offerd in any tractor on the American market today.
